HJS graduation rate has remained high due to district's efforts to personalize learning

By Myrna Trauntvein

Juab High has a high rate of graduation for seniors at the school and has maintained that high level for several years.

Catherine Bowring and Kevin Jacobsen, Juab High School counselors, were invited to the Juab School District Board of Education monthly meeting to discuss the drop-out rate of high school seniors—most graduates.

“At 8th Grade,” said Bowring. “It starts in the feeder school.”

Denise Park is the school counselor for 8th and 9th grade and is helpful in identifying those students who may need transition assistance.

The high school graduation rate in Juab School District was 78 percent in 2009.

“Juab School District is one of the top districts in the state,” said Hughes. “It is a very proud district. We are very much aligned with our parents.”

Goal setting and planning are important tools along with CCRB (College and Career Readiness Standards) which are guidelines to focus on specific skills for learners.

“I’m impressed,” said Hughes. “Students can also use pathways.”
